

Ben Brabson, Climate Scientist, Indiana University, Emeritus Professor of Physics

THE ARTS & THE SCIENCE OF CLIMATE CHANGE

Saturday, October 15, 2022, 3pm – 4:30pm

FAR Center for Contemporary Arts

505 Theatre Space

505 W 4th Street

Bloomington, IN

Free and open to the public

The Arts and the Science of Climate Change is an in-person visual presentation by Ben Brabson, Climate Scientist, Indiana University, Emeritus Professor of Physics whose recent research trends in mid-west soil moisture. This talk will focus on the deep underlying connections between the arts and the science of climate change—connections that need to be made and stories that need to be told.

“David’s work provides a unique way to address the critical elements of the climate change crisis and to reach an audience not available through other means.” Ben Brabson

Ripple Effects: The Adoration of Earth and The Arts and the Science of Climate Change are a partnership between the FAR Center for Contemporary Arts and Heartland Community Reconciliation Center, and made possible by the generous support of the Bloomington Arts Commission, The Bloomington Urban Enterprise Association, and the David and Julie Young Fund, A fund of Central Indiana Community Foundation.
